Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In view of the newly discovered prior art, the previous indication of allowed claims is withdrawn and the following prior art rejection is advanced.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent no. 6,123,314 to Steele.

Steele discloses a pin (16, 18) and a latch plate (14, 52) engaging the pin. The latch plate including a tortuous path (28, 30). The latch plate is attached to a capsule 56 (claim 2) and the pins are attached to a body 50 (claim 3) at an elevated position (see Fig. 11).

Claims 15-18 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent no. 6,929,226 to Philistine.

Art Unit: 3654

Philistine discloses a first asymmetrical cardioid-shaped plate (111, 112); and second guide plate 116, the second guide plate and the first cardioid-shaped guide plate forming a cam surface wherein the second guide plate is spaced from a portion of the first cardioid-shaped plate (element 116 is spaced from 112, for example).

With respect to claim 17, the cardioid-shaped plate includes an indentation (holes as seen in figure 2, for example; or spaces between element 112 and the main body 111) therein.

With respect to claim 18, further comprising a backing plate 111.

Claims 19 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent no. 6,631,885 to Halas.

Allowable Subject Matter

Claims 4-7 and 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

To the extent applicable, Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
